

RallyX Nordic presented by Cooper Tires

Information to become Appendix E

XC

- New engines according to FIA for 2023 to be allowed with FIA weight **425kg** incl driver
- Add +5kg to cars equipped with 750cc engines, minimum weight of **460kg** (instead of 455kg – 2021)
- We will test during spring 2023, Testing the acceleration performance between the 600/850cc vs 750cc cars, both cars with correct weight
- If 750cc turns out to be faster we will reduce max revs until it is similar to the cars equipped with FIA engines.
- That rev limitation that comes from the test will be the max revs for 750cc engines in 2023.
