### Event bulletin 2025 Rally X Latvia – Fuel

Extension of this bulletin also for Rally X Latvia 2025

Fuel:

We would like to inform you about the fuel arrangements for the first two rounds of Rally X in Montalegre and Valkenswaard.

- P1 Bio Racing 100% will be replaced with BIO100% From ETS

NOTE: P1 Bio Racing 100% that teams already have can still be used . No restrictions or limitations apply.

- P1 ECO 100 RS: This fuel may be used by those who still have available stock.

**New fuel available from the Riga event:** The planned replacement fuel of ECO100RS will only take effect from the third round of the championship (we will provide further details soon).

As a result, the authorized fuels for the first two races will be:

- **Bio Racing 100%** (either from P1 or ETS)
- **P1 ECO 100 RS** (teams own fuel still available )
- **Any FIA 102 Octane homologated fuel** (team to bring themselves)
