Bulletin 010 Crosscar, Width & height

Crosscar senior: [Red text updates to Crosscar Technical regulations.](#)

CC-T 9.2 Maximum measurements

Total length: can't exceed 2600mm without the silencer

Total width: can't exceed 1600mm (the width is measured from the outside of the rim)

Total height: 1480mm (excluding engine water radiator air intake and roof competition number)

CC-T 6.1 Covering the chassis

The body cannot have any sharp or pointy extensions. The body's front shall be covering up to the center of the steering wheel. Sides shall be a minimum of 30cm from the bottom of the frame and the thickness of the material shall be at least 0,5mm. All aerodynamic constructions are prohibited in the front of the vehicle. Redirection/spray protection in the front is prohibited if they are not integrated into the body mold.

A wing or spoiler in the rear is allowed if it is flat and has a maximum width of 1080mm and is between the head band and the rear limit of the vehicle.
