Information technical regulations Crosscar Rally X 2025

Crosscar technical regulations:

It has been noted from the stewards that there's been a double message in the article CC-T 0 General section of the Crosscar technical regulations 2025.

Rally X has always wanted to allow National approved ASN Crosscar's as well into our series. Crosscars who are not on the FIA 279b list of approved chassis will automatically have to run in the 460kg weight class.

Please see below the corrected writing with the removal of "built according to FIA 279B"

CC-T 0 GENERAL

It's allowed to make redactions or changes to the rules during an active season if it is necessary from a safety standpoint or other important reasons.

FIA homologated crosscars can participate according to FIA cross car technical regulations with some minor changes to fuel and ECU rules.

FIA registered Crosscar chassis by FIA 279B are allowed to use, or a national ASN approved registered Crosscar.

In new market to help the growth of the category Rally X reserves the right adjust the approved regulations necessary.

Rally X goals for 2027: FIA Fuel tanks mandatory
